Presentation Outline

1. Abstract
2. Introduction
3. Analysis
4. Requirements
5. Methodology
6. Conclusion

ADITYA UNIVERSITY

ABSTRACT

- The **Complaint Management Portal (CMP)** is a web-based application developed to provide students with an efficient platform to raise complaints related to academics and campus facilities.
- The portal ensures proper documentation of all student complaints.
- It helps management analyze recurring issues and improve services.
- Role-based access improves system security and data privacy.
- The system is accessible anytime, reducing dependency on office hours.
- Overall, CMP enhances student satisfaction through faster and reliable grievance redressal

INTRODUCTION

- In educational institutions, students often face issues related to academics, infrastructure, or campus services.
- Traditional complaint handling methods such as verbal communication or written applications are time-consuming, inefficient, and lack proper tracking.
- The **Complaint Management Portal** is designed to overcome these limitations by providing an automated system where students can register complaints anytime and monitor their progress.
- The system ensures faster resolution, proper documentation, and improved student satisfaction by digitizing the grievance redressal process.

Existing System

Currently, student complaints are handled using:

- Manual complaint registers
- Written applications
- Direct communication with staff

Limitations of Existing System:

- No proper tracking of complaint status
- High chances of complaints being ignored or delayed
- Lack of transparency and accountability
- Difficulty in maintaining complaint records
- Time-consuming and inefficient process

ADITYA UNIVERSITY

Proposed System : The proposed system is a **web-based Complaint Management Portal** that provides a centralized platform for complaint handling.

Key Advantages of Proposed System:

- ✓ Students can submit complaints online and track them in real time.
- ✓ Admin dashboard helps in quick and efficient complaint resolution.
- ✓ Feedback system improves service quality after resolution.
- ✓ Role-based access ensures security and data privacy
- ✓ Reduces manual work and paperwork.
- ✓ Enhances transparency and communication between students and administration.

REQUIREMENTS

Hardware Requirements

1. Processor: Intel i3 or above
2. RAM: Minimum 4 GB
3. Storage: Minimum 20 GB
4. Input Devices: Keyboard, Mouse
5. Output Device: Monitor

Software Requirements

1. Operating System: Windows / Linux
2. Frontend: HTML, CSS, JavaScript
3. Backend: Java / Python / Node.js
4. Database: MySQL / MongoDB
5. IDE: VS Code / Eclipse
6. Web Browser: Chrome / Edge

METHODOLOGY

Modules:

1. User Registration & Login Module
Allows students and administrators to securely register and log in to the system.
2. Complaint Submission Module
Enables students to submit complaints related to academics and campus facilities.
3. Complaint Categorization Module
Classifies complaints into different categories for efficient handling.
4. Complaint Tracking Module
Allows students to track the current status of their complaints in real time.
5. Admin Resolution Module
Enables administrators to view, update, assign, and resolve complaints efficiently.
6. Notification Module
Sends alerts to students regarding complaint status updates.
7. Feedback Module
Allows students to provide feedback after the complaint is resolved.

CONCLUSION

- The Complaint Management Portal provides an efficient digital solution for handling student grievances.
- It replaces the traditional manual complaint system with an organized online platform.
- The system ensures transparency through real-time tracking and timely resolution.
- Administrative efficiency is improved by structured complaint management and reporting.
- Overall, the portal enhances student satisfaction and institutional accountability.

THANK YOU
